

DHARUNKUMAR

kumardharun607@gmail.com | 6379888340 | Chennai | <https://github.com/kumardharun607>

PROFESSIONAL SUMMARY

Motivated Java Developer (Fresher) with strong fundamentals in **Core & Advanced Java**. Hands on knowledge of **Oracle SQL and Frontend Technologies**. Eager to contribute to backend development and grow into a **Java Full Stack Developer**.

EDUCATION

B.E Computer Science and Engineering, Sasurie College of Engineering 2021 – 2025
CGPA : **8.09**

HSC, 2020 – 2021
Cambridge Matriculation Higher Secondary School, Panthampalayam
PERCENTAGE: **84%**

SKILLS

Java: Object-Oriented Programming (OOP), Java Collections Framework, Exception Handling & Multithreading Basics.

Java 8 Features: Stream API, Lambda Expressions, Functional Interfaces, Method References.

Advanced Java: JDBC, Servlets , Hibernate (ORM, Mapping), JPA.

Spring Framework: Spring Core, Spring MVC, Spring Boot (REST APIs).

Design Patterns: Singleton, Factory, MVC, DAO Pattern.

HTML: Semantic HTML5, HTML Forms & Input Handling.

CSS: Responsive Web Design, CSS Flexbox & Grid Layout, UI Styling & Cross-Browser Compatibility.

JavaScript: DOM Manipulation, Event Handling, Functions, Closures, Array Methods (map, filter, reduce), JSON.

React.js: Components, JSX, Props & State, React Hooks, Event Handling, Conditional Rendering, Routing Basics.

Oracle SQL: SQL Queries & Joins, Database Design & Normalization, CRUD Operations.

GIT & GITHUB: Version Control using Git, Repository Management.

INTERNSHIP

QuantumQLabs 10/2024 – 05/2025

- Worked in challenging environment to develop innovative web solutions.
- Gained hands on exposure to real time project work flow and debugging.

PROJECTS

Bank Loan Management System – (Core Java)

- Developed a Bank Loan Management System using Spring Boot, Hibernate, JPA, Oracle SQL, HTML, CSS, and JavaScript.
- Implemented loan application, eligibility checking, EMI calculation, approval workflow, and repayment tracking modules.
- Tested APIs with Postman and managed source code using Git and GitHub.

Smart Healthcare Solutions for Multi-Disease Prediction

- Developed a full-stack healthcare application using Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Oracle SQL, HTML, CSS and JavaScript to assist in early diagnosis of multiple diseases using user-provided symptoms.
- Built RESTful **APIs** to collect patient symptoms, manage patient records, and generate disease prediction results.
- Implemented backend business logic using Spring Boot to analyze symptoms and predict possible diseases based on predefined medical datasets and rules.

CERTIFICATIONS & ADDITIONAL

Git & GitHub

- Completed Git and GitHub, Gained practical knowledge of Git and GitHub, including version control basics, repository creation, and source code management.

Conference Paper Presentation Certificate

- Presented a Research Paper titled “Smart Healthcare Solution For Multi Disease Prediction Using Symptom Analysis For Early Diagnosis” at Sree Sakthi Engineering College.

COURSE

Java Full Stack Development - QSpiders-Vadapalani, Chennai
